

## Warm Up

The graph shows the number of people who visited U.S. theme parks in recent years.

1. Find the rates of change for 2000-2002. What does this rate of change mean?
2. Find the **average** rate of change from 2000 to 2006.
3. Which of the **three** periods of time shown in the graph had the greatest change in visitors? How did you know?
