

Scavenger Hunt!

1. Start at any problem in the room. (Do NOT all start in the same place!)
2. In the first box on your paper, solve the problem for the value of the variable.
3. Look around the room at the other problems to see if you can find the answer you just solved. Once you find it, start that in the box right next to the last problem you did!
4. Once you've completed all 12 problems, check your answers with Mrs. Furno
5. Pick up the review worksheet from the stool and get started - whatever doesn't get finished will become homework.
